

ScreenSense milestone 4 Documentation

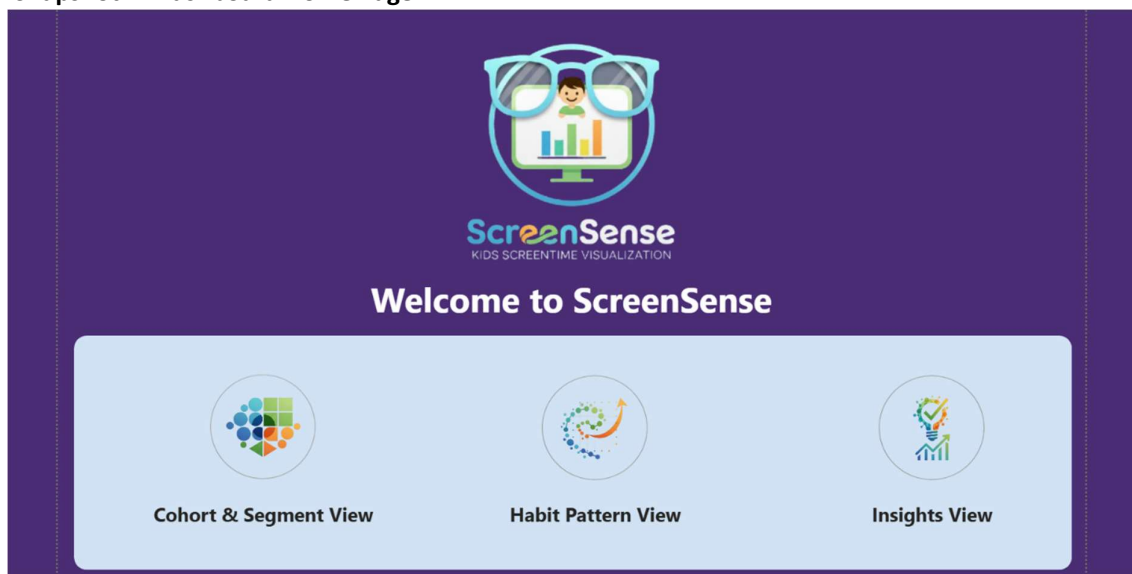

1. Introduction

This milestone focuses on creating the final Power BI dashboard, arranging all visuals into a clear storyline, preparing documentation, and completing the final presentation. It includes work from Week 7 and Week 8.

2. Week 7 – Visual Report / Dashboard Preparation

2.1 Dashboard Home Page

Snapshot 1: Dashboard Home Page

Explanation:

“This is the home page of the dashboard with navigation buttons that lead to different views like Cohort View, Habit View, and Insights.”

2.2 Storyline Creation

The dashboard visuals were arranged in the following narrative order:

1. Overall KPIs
2. Cohort and Segment Analysis
3. Habit Patterns
4. Risk Segmentation
5. Summary Insights

This helps users move from general trends to deeper insights easily.

2.3 Filter Panel

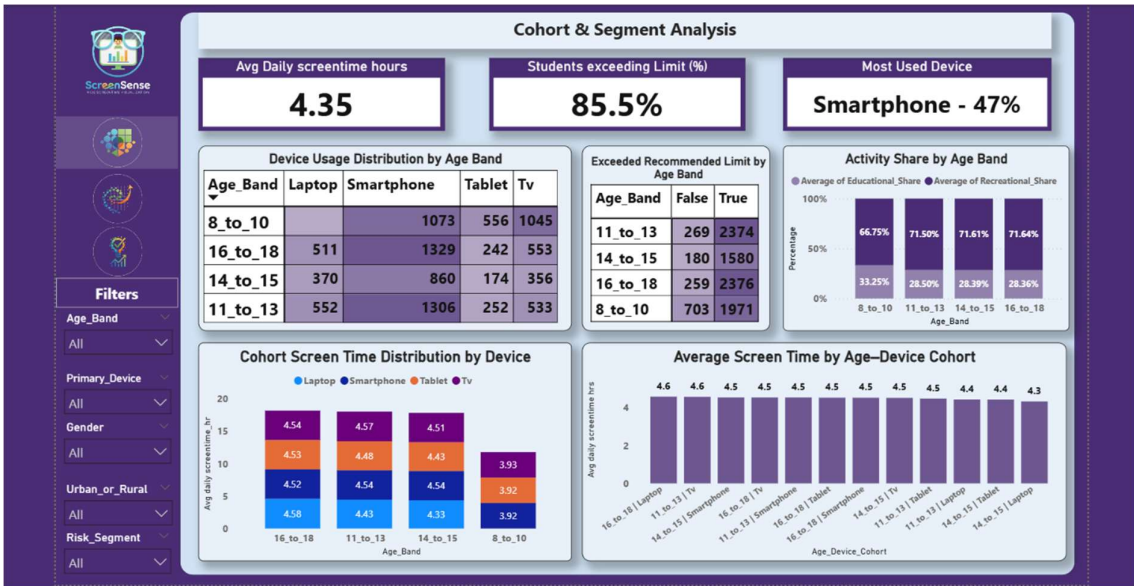

📷 Snapshot 2: Filters Panel (Age, Gender, Device, Location, Risk Segment)

Explanation:
“The dashboard includes filters such as age band, gender, device type, and location, which allow users to explore specific groups.”

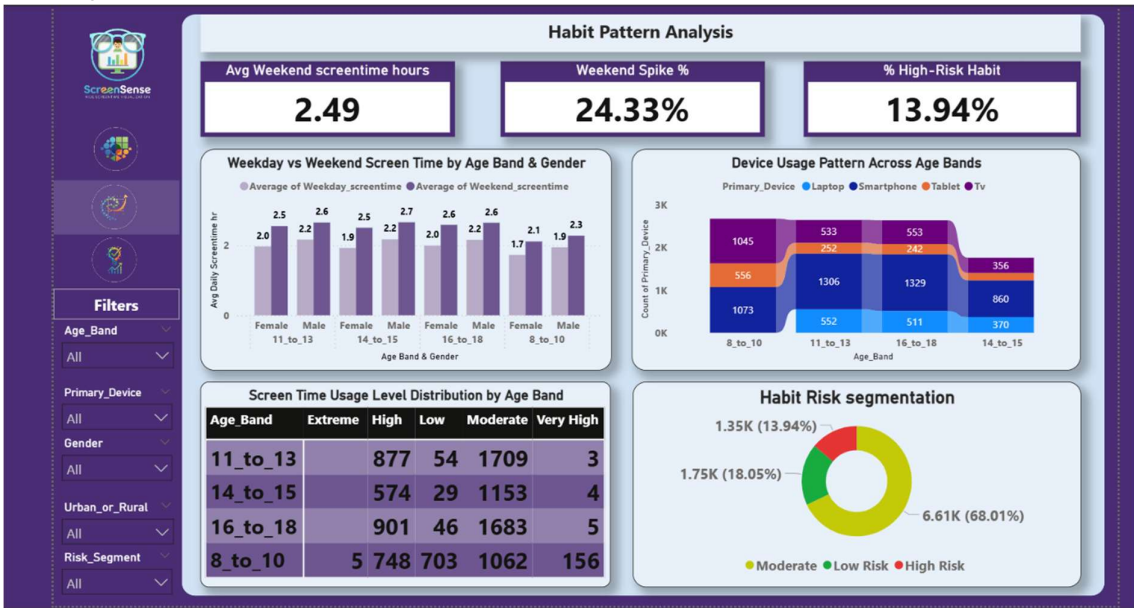

2.4 Cohort & Segment Analysis Page

📷 Snapshot 3: Cohort & Segment Analysis

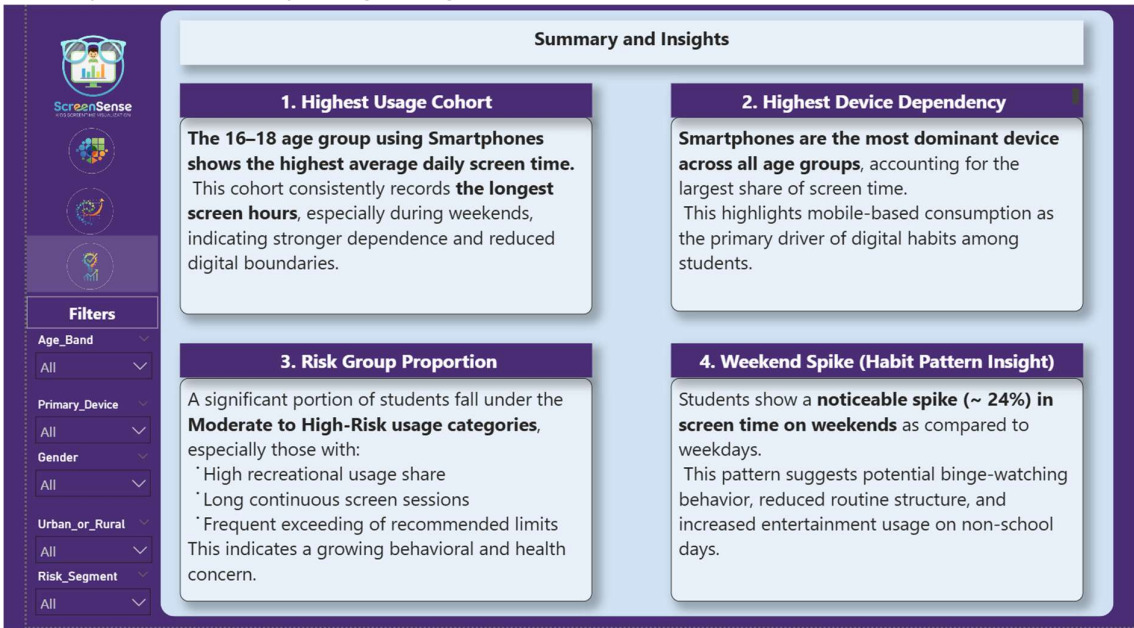

2.5 Habit Pattern Analysis Page

Snapshot 4: Habit Pattern view

2.6 Summary & Insights Page

Snapshot 5: Summary / Insights Page

Key observations included on this page:

- Highest usage cohort
- Device dependency

Harshit Pandey
pandeyharshit7277@gmail.com

- Risk group proportion
- Weekend spikes

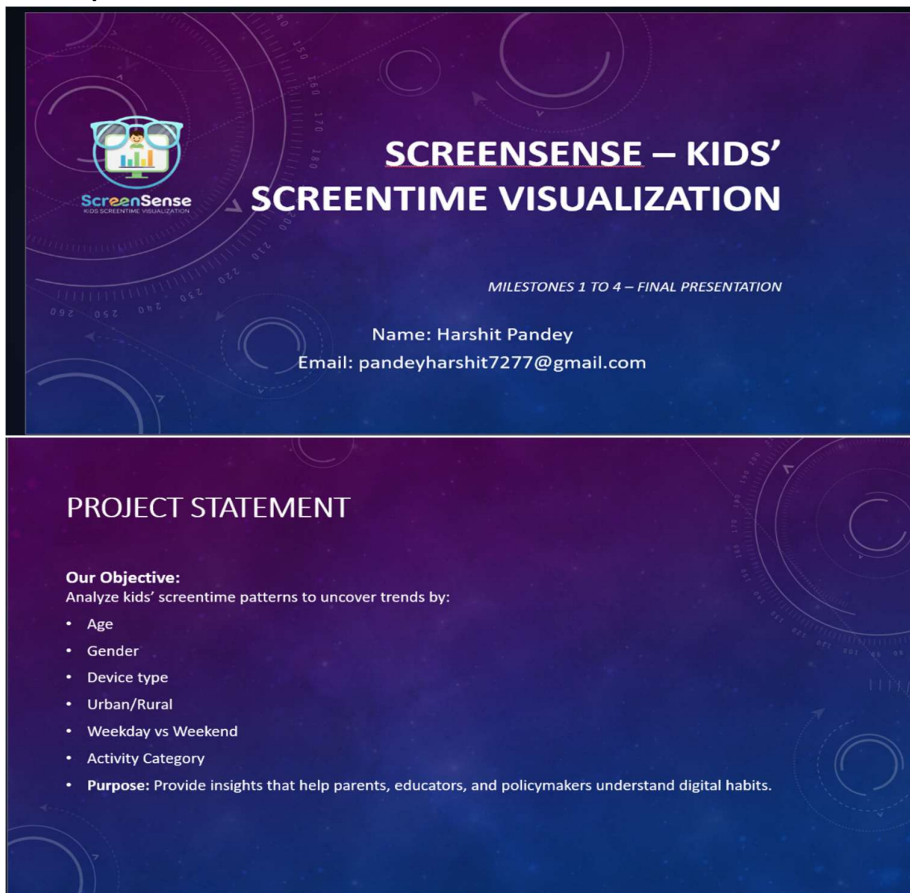

3. Week 8 – Documentation & Final Presentation

3.1 Final Report & Slides

A clean PDF report and slide deck were created summarizing:

- Project objective
- Dataset details
- Cleaning steps
- Key visuals
- Dashboard explanation
- Final insights

Snapshot 6.: Slide Deck Preview

3.2 Deliverables Summary

Deliverable	Status
Final Power BI Dashboard	✓ Completed
Visual Documentation	✓ Completed
Final PDF/README	✓ Completed
Presentation Slides	✓ Completed
Dashboard Walkthrough	✓ Ready

4. Conclusion

Milestone 4 brings together all the work done throughout the project. The final dashboard — **ScreenSense** — provides clear insights into:

- Kids' daily screentime
- Weekend behavior
- Device dependency
- Age and location patterns
- Risk levels

The dashboard is interactive, easy to explore, and supports decision-making for understanding digital habits.
